PLANET DATA

Planet Data Expands Into Europe

Netherlands Facility Offers Full Range of ESI Processing and Project Management Support to Firm's European Clients

Elmsford, NY – January 6, 2009 – Planet Data, the leading global provider of defensible, high quality, and cost-effective discovery management services, today announced the opening of its first office in Europe to better serve its growing roster of international clients. Located near Amsterdam, the Netherlands, the office will serve as the primary Electronic Storage Information (ESI) processing and hosting facility for companies based in the EU.

Mirroring the company's operations in the USA, a fully staffed and comprehensive team of Planet Data ESI expert professionals will be permanently based in the Netherlands to provide a full range of processing, hosting and project management support on all ESI-related initiatives for the firm's customers.

"Electronic discovery will continue to evolve and become more complex, broadening in breadth and scope on a worldwide basis, as we move deeper into the 21st century," said Zoltan Horvath, President of Planet Data. "It is imperative for us to have a dedicated team of ESI expert professionals located in Europe to better serve our EU clients. The Netherlands offers a central European location that demonstrates our commitment to providing timely, state-of-the-art support for our EU clients, as well as enabling us to address and keep pace of the growing international issues and needs of this industry."
